

Model Performance Test

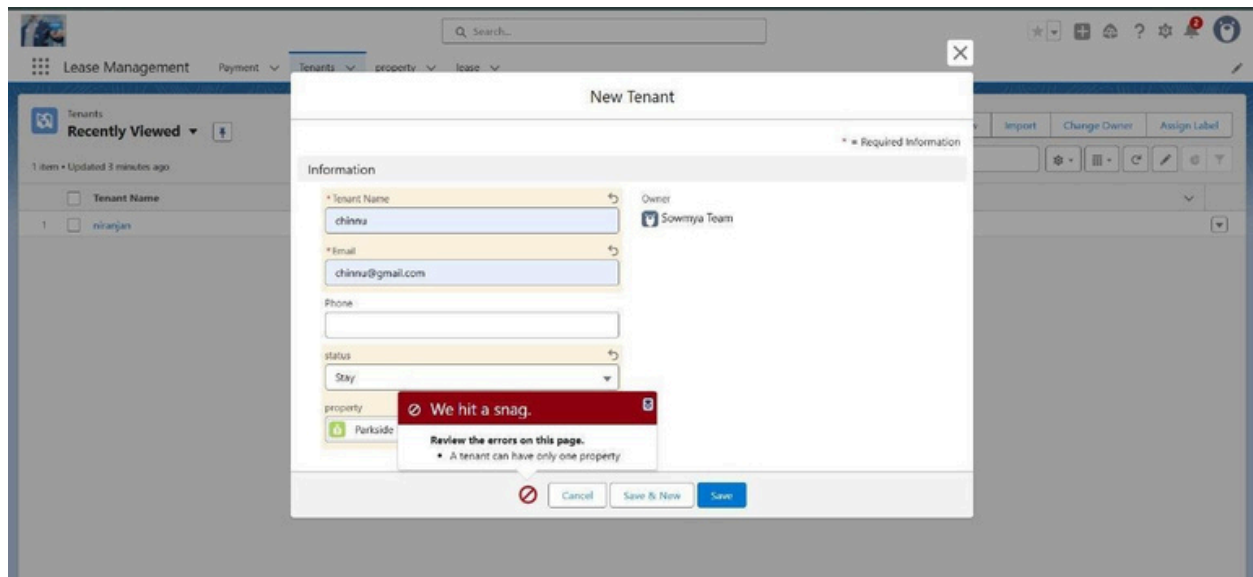

Date	21 JUNE 2025
Team ID	LTVIP2025TMID29234
Project Name	Lease Management
Maximum Marks	

Model Performance Testing:

Trigger Error:

Validation logic is applied when incorrect or mismatched data is entered during lease record creation (e.g. lease start date after end date).

System throws an error and prevents record creation.

Validation Check – Dates Different & End Date is Less:

Business rule checks that lease End Date must be after Start Date. If End Date is lesser, system shows validation error and restricts submission.

The screenshot shows the 'supriya' Lease Management interface. The 'Details' tab is active, displaying a form for a lease. The 'start date' is set to 6/20/2025 and the 'end date' is set to 6/19/2025. A red error message box is displayed, stating 'We hit a snag. Review the following fields: start_date'. The 'end date' field is highlighted in yellow. The 'property' field is empty. The 'Created By' field shows 'Sowmya Teams' and the 'Created By' date is 6/23/2025, 3:13 AM. The 'By' field shows 'Sowmya Teams' and the 'By' date is 6/26/2025, 7:38 AM. The 'Activity' panel on the right shows 'Upcoming & Overdue' activities.

Validation Rule Check – Dates Same:

A validation rule ensures Start Date and End Date cannot be the same. System flags this as invalid and prompts user to revise inputs.

The screenshot shows the 'supriya' Lease Management interface. The 'Details' tab is active, displaying a form for a lease. The 'start date' is set to 6/20/2025 and the 'end date' is set to 6/20/2025. A red error message box is displayed, stating 'We hit a snag. Review the following fields: start_date'. The 'end date' field is highlighted in yellow. The 'property' field is empty. The 'Created By' field shows 'Sowmya Teams' and the 'Created By' date is 6/23/2025, 3:13 AM. The 'By' field shows 'Sowmya Teams' and the 'By' date is 6/26/2025, 7:38 AM. The 'Activity' panel on the right shows 'Upcoming & Overdue' activities.

Flow Testing – Payment Update:

Flow automation updates Payment Status automatically upon payment log entry.

Test confirms the status updates accurately and triggers notification.
